PROFILE INFO

As a seasoned Software Engineer with a robust background spanning 6 years in Full-Stack Web Development and 4 years focused on DevOps Engineering, I am driven by a passion for creating seamless deployment experiences through automated CI/CD pipelines. Proficient in every facet of the process, I excel in crafting scalable servers and databases to optimize functionality, alongside designing and developing APIs to elevate performance. Committed to continuous learning and personal growth, I approach every challenge with a proactive mindset, eager to expand my expertise and drive superior results.

EXPERIENCE

2024

CV2CAREER - Sydney

Software Engineer

- Spearheaded the design phases of an Al-driven API, which aimed to revolutionize CV writing processes within the company. This involved strategizing the integration of cutting-edge AI technologies to automate various aspects of the workflow, ensuring seamless operations and optimal efficiency gains.
- Executed the development and deployment stages of the API, translating conceptual ideas into tangible solutions that streamlined CV writing processes comprehensively. This entailed leveraging advanced AI algorithms to automate the entire process, from initial content generation to final document output, resulting in significant time and resource savings for the company.

2024 - Present

NEXATINI - Enugu

Founder & Full Stack Developer

- Built and launched a large-scale design reference platform for mobile and web UI/UX inspiration.
- Developed the frontend using React, focusing on responsive design and seamless user experience.
- Engineered the backend with Node.js, implementing RESTful APIs and scalable
- Integrated authentication, search, and advanced filtering features.
- Managed deployment, performance optimization, and ongoing feature enhancements.

2025 - Present

CARSIUGO - Lagos

Founder & Full Stack Developer

- Designed and developed a web platform for vehicle sale and importation.
- Built the frontend with React, delivering a modern, responsive, and user-friendly interface.
- · Developed the backend using Go (Golang), focusing on high performance and scalability.
- Implemented RESTful APIs, authentication, and advanced search/filter features.
- Managed deployment, maintenance, and continuous improvements.

EDUCATION

Enugu State University of Science and Technology

MSc in Computer Science

2022 - 2023

Enugu State University of Science and Technology

BSc in Computer Science

2018 - 2021

edX

Havard's CS50

2019

SKILLS —

- HTML, CSS & JavaScript
- ReactJS & NextJS
- NodeJS
- Go
- Python
- Docker
- Redis
- Kubernetes
- Ansible
- Terraform
- Jenkins
- Grafana
